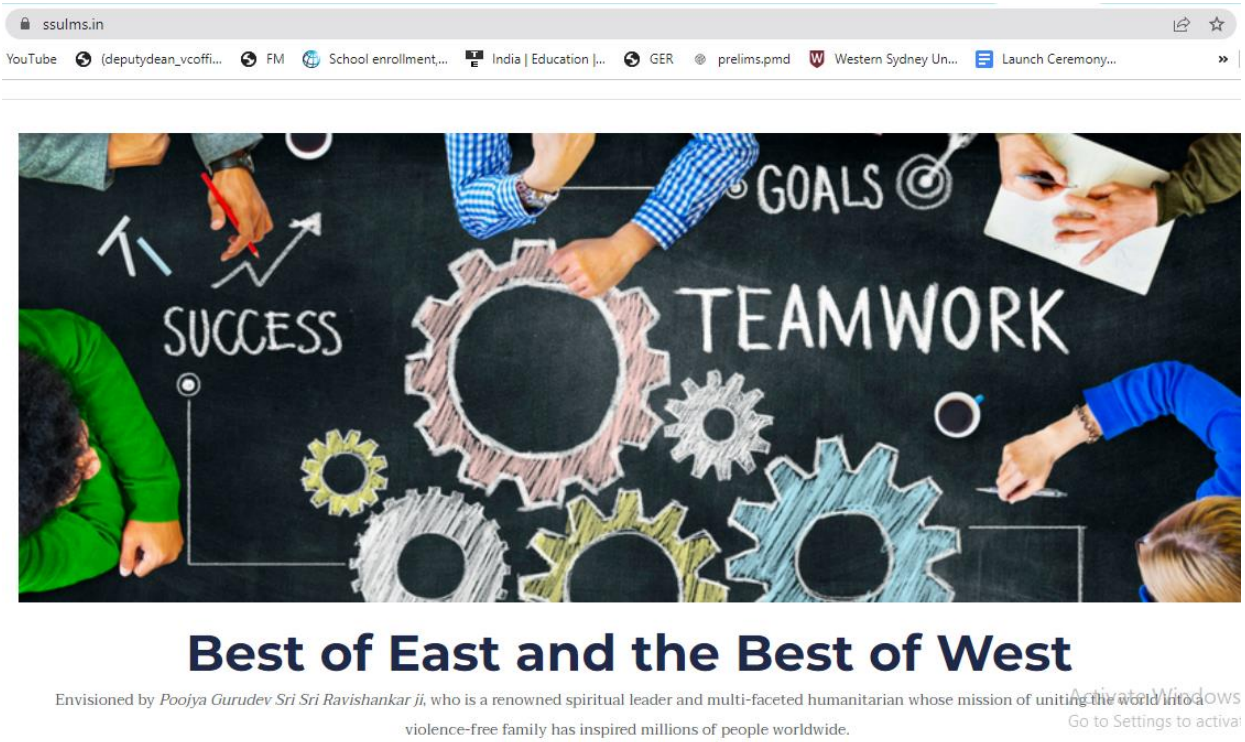
Free access to educational resources


Sri Sri University has created a shared ecosystem which offers free educational materials and resources for student fraternity across the globe. Our infrastructural facilities like agriculture lab, Incubator lab, Computer lab have been used by hundreds of students who are not part of our University and benefitted in enhancing their learning process. Sri Sri University runs its own Online Learning Management System (LMS) www.ssulms.in, wherein the lectures of our best in class Faculty members are recorded and are accessible by which creates and curates free massive open online courses and educational materials. We have also launched a Learning Management System to avail access to courses/lectures online. We run free skill development certificate courses for those not studying in the University.
