SDG14: LIFE BELOW WATER

14.2 Supporting aquatic ecosystems through education

14.2.1 Fresh-water ecosystems (community outreach) Offer educational programmes on fresh-water ecosystems (water irrigation practices, water management/conservation) for local or national communities

Description

Sri Sri University, with its unwavering commitment to the promotion of water and life in its educational programs, exemplifies a holistic approach to addressing critical environmental issues and fostering community engagement. The university's vision revolves around environmental sustainability and a comprehensive education that extends beyond academic boundaries, which is reflected in its dedication to water-related initiatives.

At the heart of these efforts are the two global resource centers that Sri Sri University has established for the explicit purpose of advancing education, research, and community outreach in matters related to water. These centres act as hubs for knowledge dissemination and problem-solving in the complex field of water resources.

Sri Sri Center for Advanced Research in Water Resources and Environmental Management (SSCARWREM), plays a pivotal role in the university's mission. SSCARWREM has initiated specialized programs aimed at industry workers and students, focusing on the essential subject of environmental impact assessment. These programs are instrumental in educating and sensitizing individuals in industries about the environmental repercussions of their operations. By fostering a sense of responsibility and awareness, the university contributes to the creation of environmentally conscious professionals who can help drive positive change in their respective sectors.

Community outreach is another cornerstone of Sri Sri University's dedication to water-related causes. Under the prestigious W20 vertical, the university has organized programs specifically designed to

empower women in rural areas. These initiatives focus on climate change and sustainable agricultural practices, offering valuable knowledge and skills to women actively engaged in agriculture. The impact of these programs has been profound, with over 120 village women benefiting from the education and support they provide. By equipping these women with the tools, they need to adapt to changing environmental conditions, Sri Sri University enhances their resilience and ability to thrive in their agricultural endeavors.

In the realm of public health, Sri Sri University has extended its proactive stance. It has organized educational programs on waterborne diseases in the form of webinars, ensuring that crucial knowledge is widely accessible. These initiatives play a pivotal role in raising awareness about the severe consequences of waterborne diseases and educating the public about the risks they pose. By making this information readily available, the university contributes to the prevention of waterborne illnesses and the promotion of public health.

Sri Sri University's comprehensive approach to education and community engagement demonstrates its deep commitment to addressing critical environmental and health issues. These initiatives showcase not only the university's dedication to disseminating knowledge but also its determination to leave a lasting, positive impact on local communities and society as a whole. By integrating education, research, and community outreach in its mission, Sri Sri University stands as a beacon of sustainability and positive change in the field of water resources and environmental management.

SRI SRI UNIVERSITY
LEARN LEAD SERVE

Sri Sri Centre for Advance Research in
Water Resources & Environmental Management
offers

**Certificate Course in
Environmental Impact Assessment**

8 Weeks Certificate Programme

Commencement of the programme : 1st week of July
Schedule: Weekend Evening (Saturday and Sunday) 2 hours/ day

Eligible candidates: Industry professionals, environment consultants, environmental engineers, researchers, academicians, graduates, and post-graduate students

Course Outcome :
After the completion of the course, the aspirants will be able to

- Understand the overall process of EIA in India
- Know the various methodologies of data collection
- Prepare the Environmental Impact Assessment and Management reports
- Join the various consultant organizations and get employment opportunities
- Be a freelance consultant

Course Fee (Per Person) :
Sri Sri University Students: 2500/-
Sri Sri University Faculty Member: 3000 /-
Other Students (Individual) - 4000/-
Students Group (Minimum 3 students)- 3000/-
NGOs (minimum 3 people) - 2500/-
Art of Living Members: 2500/-
Industry Professional/ Academician/ others - 5000/-
Group Members (Industry Professional/ Academician/ others) - 4000 /-

LAST DAY
25th June 2022

Program Director:

Prof. Jay Prakash Bhatt,
Professor, Environmental Science
Experience in more than 50 EIA/CIA projects
Former Senior Scientist, CISHME, Delhi University

Program Convener:

Satyajeet Arya,
Assistant Professor (Environmental Science) &
Director, Sri Sri Centre for Advance Research in
Water Resources & Environmental Management
