SDG13: CLIMATE ACTION

13.3 Environmental education measures

13.3.2 Climate Action Plan, shared

Have a university Climate Action plan, shared with local government and local community groups

Description

1. Sri Sri University has a well-established **Sri Sri University Centre for Climate Change and Sustainability Education and Practices**, dedicated to enhancing climate change awareness among students and youth. The Centre works to promote sustainability on campus, conduct capacity-building initiatives, and foster collaboration with local and global experts on climate resilience and environmental management.
For more details: <https://srisriuniversity.edu.in/sri-sri-university-resource-centre-for-climate-change-sustainability-education-practices/>
2. Sri Sri University has framed a Climate Action Plan, which reflects in the activities, events and programmes conducted by the University (**copy attached**). Sri Sri University as an institute is committed to address all the issues related to the adverse impacts of climate change. The Climate Action Plan of Sri Sri University has been made on the lines of the National Action Plan for Climate Change with slight modifications.

Conclusion:

Sri Sri University's Climate Action Plan is centered on seven focus areas: renewable energy use, efficient energy management, green campus development, water conservation, biodiversity protection, sustainable food systems, and climate change education. The university has its Climate Action Plan in place covering various activities like

continuous plantation drives, use of solar energy, use of energy efficient appliances, and responsible waste management. Water-saving measures are implemented across hostels and academic blocks. The university promotes organic and locally sourced food through its own agricultural farms and cow farm. The university also shares its Climate Action Plan with nearby communities to encourage wider participation and collective climate action.
