Impact Ratings**

Although Sri Sri University is not yet a formal partner in early warning or monitoring systems, the university plays an important supportive role through **education, research dissemination, and youth engagement**. Data and findings from its campus sustainability activities, such as energy audits, waste management studies, and biodiversity assessments are periodically shared with local authorities for inclusion in district sustainability reviews.

Conclusion:

The coastal area of Odisha is highly prone to the natural calamities, viz. cyclones, floods, etc. Researches indicate that the frequencies of such calamities have increased due to the climate changed. Sri Sri university is very much concerned and receives all notifications regarding the cyclones, and floods. University has developed a mechanism and all the stakeholders are informed through notification. University is committed to follow guidelines of the Government of Odisha. In order to improve the system, a section under the office of the Registrar is dedicated to be informed from the Government of Odisha, India Meteorological Department, etc.
